### **DETAILED ACTION**

1. This office action is in response to the Application 10/811,835 filed 03/30/2004 and amendment filed 06/29/2007.

2. Claims 1-15 remain pending in the Application.

3. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 06/29/2007 has been entered.

### ***Election/Restrictions***

4. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, 10-15, drawn to a method of designing a circuit layout of a semiconductor integrated circuit, classified in class 716, subclass 19.
- II. Claims 6-9, drawn to a method of changing a circuit layout of a semiconductor integrated circuit, classified in class 716, subclass 11.

5. The inventions are distinct, each from the other because of the following reasons:

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

6. This application contains claims directed to the following patentably distinct species: Group I and Group II. The species are independent or distinct because the claims of the Group I describe designing a mask layout of the integrated circuit, while the claims of the Group II describe a method of changing a circuit layout of a semiconductor integrated circuit. Moreover Groups I and II are disclosed as two separate embodiments and described by different Drawings, such as subject matter of the Group I is described by Figures 1-6 and subject matter of the Group II is described by Figures 7-10 (paragraph [0044] of the Patent Application Publication of the instant Application.

7. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

8. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

9. A telephone call was made to Donald Studebaker (registration No. 32,815) on 09/07/2007 to request an oral election to the above restriction requirement, but did not result in an election being made.

10. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

11. The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
